**The resident population:** All the information refers to people normally resident in the area at the time of the census on the night of 29<sup>th</sup> April 2001. It excludes people who were staying temporarily in the area, but includes those who normally lived there but were away on census night (people on holiday, for example). Students were, unlike in 1991, included at their term-time address rather than at their parental address. This change in the total population base means that comparisons with results from the 1991 Census are difficult.

**Households:** The census defines a household as one person living alone or a group of people (not necessarily related) living at the same address and sharing either a living room or sitting room, or at least one meal a day.

**Qualifications:** The census defines levels of qualifications as:

- **Level 1** – 1+ 'O' level passes, 1+ CSE/GCSE any grades, NVQ level 1, Foundation GNVQ
- **Level 2** – 5+ 'O' level passes, 5+ CSEs (grade 1), 5+ GCSEs (grades A-C), School Certificate, 1+ 'A' levels/'AS' levels, NVQ level 2, Intermediate GNVQ
- **Level 3** – 2+ 'A' levels, 4+ 'AS' levels, Higher School Certificate, NVQ level 3, Advanced GNVQ
- **Level 4 or 5** – First degree, Higher degree, NVQ levels 4 and 5, HNC, HND, Qualified Teacher Status, Qualified Medical Doctor, Qualified Dentist, Qualified Nurse, Midwife, Health Visitor

**The One Number Census Project:** Shortly after the census, a door-to-door survey - the Census Coverage Survey - was undertaken, providing information on people and households who had been missed from the census. Full details of the missing people have been added to the census database, so that the census represents the whole population.

**Confidentiality:** In order to protect the confidentiality of respondents, small random changes were made to the information collected. Some information was 'swapped' between areas or respondents, and very small numbers were rounded to the nearest 3. This means population and household totals may differ slightly between different tables.
