

Electoral counts and forecasts

The following documents set out the current electorate (from the 2003 Electoral Register) and five-year forecast electorate (to 2008) for each new district ward in Cambridgeshire, broken down by parish where appropriate. A table is given for each district. Appendix 1 details the housing permissions and allocations that inform the forecasts, and Appendix 2 outlines the forecasting methodology used. It should be noted that only housing developments with planning permission or those fully incorporated into Local Plans can be included in the forecasts. Forecasting is an inexact science and the figures given are the County Council's best estimates on the basis of current information.

Cambridge City
East Cambridgeshire
Fenland
Huntingdonshire
South Cambridgeshire

Appendix 1 – Housing permissions and allocations included in the electoral forecasts

Appendix 2 – Methodology used to produce five-year electoral forecasts.
